CENTRAL OTAGO STONE MASONRY

PASSIONATE ABOUT THE ART OF STONE MASONRY

PLASTERED/RENDERED

The joints of the stone work are pointed with a coloured render. Off yellow, or a creamy white are most commonly used.

MORTAR JOINT

5 or 10mm mortar joint between each stone. This creates a shadow to define each stone.

TIGHT STACK

Tight Stack has no mortar showing between the joints. A very modern look.

DRY STACK

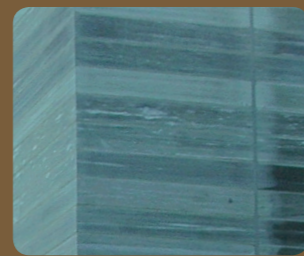

Dry stack is used mostly for retaining or free standing walls, gravity holds the stone in place and no concrete is used.

STONE PAVING

Paving Stones are split at the quarry and laid like tiles but in random shapes. Great for outdoor areas and entrance ways.

NATURAL STONE TILE

Stone Heritage can source, supply and lay a variety of natural stone tiles. Enquire for more details.

Plastered/Rendered stone. Le Spa, Sofitel Queenstown

Plastered/Rendered stone. Wakatipu Grill, Kawarau Falls Station

Natural Stone Tile, Private Residence

The team at Stone Heritage share and maintain a common goal striving to supply an exceptional level of stone masonry.

We pride ourselves on delivering projects on time and to a high standard thanks to our large team of experienced stonemasons.

Stone masonry can be individually crafted with different types of stone and colours of mortar to suit different landscapes and architectural forms. Whether it's modern sleek stone cladding or a rustic aged stone entry, we are always willing to provide options to complement your building project.

Stone masonry is timeless, hardwearing and adds capital value to your property.

At Stone Heritage we take great pride in the final products that we offer:

- Residential
- Commercial
- Landscaping
- Exterior/Interior
- Fire Places
- Paving
- Natural Stone Tiles
